

Aung Naing Win

FRONT-END DEVELOPER

WHY ME?

As a young bloke with immense interest in Information Technology, enrolled in university of Lathan to pursue a career in web/application development industry. Combined with the experience I had and my endless exploration into the heart of technologies, I wanted to learn more and took a break and utilize it. In that brief period, I was able to successfully launch and develop an entire project . With all the wondering of what's going to be next, the journey awaits

WORK EXPERIENCE

YEARS / TIME FRAME

FREELANCE FULL STACK DEVELOPER at Wunder Tek
APR 2022 / -

Yangon, MM

I am working freelance with WunderTek implementing various features for them for both frontend and backend project.

FULL STACK DEVELOPER at Mehr Capital
AUG 2022 / NOV 2022

Remote, US

- Developed a cryptocurrency price website that used a single codebase to handle, analyze, and show data for numerous cryptocurrencies across many domains.
- Created a Node.js web scraping program to assist the firm in downloading public data, including over 10,000 company descriptions and live stock prices, enriching internal data, and handling, analyzing, and displaying data on the frontend using Next.js.
- Ensure the applications' security so that they can interact with multiple APIs and databases safely.
- Managed time-sensitive updates, such as changing content and upgrading databases.
- Completed all phases of planning, developing, and debugging web applications and software precisely in accordance with the requirements laid out by the CTO and CMO.

FULL STACK DEVELOPER at Wunder Tek
MAY 2020 / AUG 2021

Yangon, MM

I've experience in working on both front-end and back-end project. In front-end, i've built appealing UI design in harmony with Figma blueprints. The back-end part was done effectively with Express JS along with MongoDB for database purposes. In addition to that. I have used testing libraries for both roles.

FRONT-END DEVELOPER at Zino Tech.
AUG 2019 / MAR 2020

Yangon, MM

Successfully developed and Launched Andriod + Web applications based on React , React Native and ExpressJS. Collaborated with three others developers to manage a PoS system using React and NextJS

PERSONAL PROJECT

ONE PAGE PROTOTYPE (OP2)

A prototyping multiplatform application (windows/mac/linux) built using JS and its relevant frameworks and libraries. Developed for the purpose of creating single webpages in a matter of minutes, codes are generated after the customization is done by the user. also includes the functionality to import and export codes.

SE2020 (PRODUCT MANAGEMENT WEBSITE)

award-winning manage-product website alongside two other team members under the title of SSDLC (Secure Software Development Life Cycle). I contributed to this project as a front-end developer, utilizing React and Redux.

PORTFOLIO WEBSITE FOR DEVELOPER

With Gasby and Tailwind, an open source portfolio template for Developers.
