FRONT-END DEVELOPER

YEARS / TIME FRAME

FULL STACK DEVELOPER at Wunder Tek
MAY 2020 / AUG 2021

📍 Yangon, MM

I've experience in working as both front-end and back-end project. In that front-end, i've built appealing UI design in harmony with Figma blueprints. The back-end part was done effectively with Express JS along with MongoDB for database purposes. Plus, I've used testing libraries in both of the following role.

FRONT-END DEVELOPER at Zino Tech.
AUG 2019 / MAR 2020

📍 Yangon, MM

Successfully developed and produced Andriod + Web applications based on React , React Native and ExpressJS.Collaborated with a team to manage a PoS system using React and NextJS

WHY ME?

As a young bloke with immense interest in Information Technology, enrolled in university of Lithan to pursue a career in web/application development industry. Combined with the experience I had and my endless exploration into the heart of technologies, I wanted to learn more and took a gap and utilize it. In that brief period, I was able to successfully launch and develop an entire project . With all the wondering of what's going to be next, the journey awaits

PERSONAL PROJECT

ONE PAGE PROTOTYPE (OP2)

A prototyping multiplatform application (windows/mac/linux) built using JS and its relevant frameworks and libarries. Made with the purpose of creating single webpages in a matter of minutes, one can expect codes to be generated after customising at their choice. with the functionality include the ability to import and export codes

SE2020 (PRODUCT MANAGEMENT WEBSITE)

award-winning manage-product website alongside two other team members under the title of SSDLC (Secure Software Development Life Cycle). I contributed this project as a front-end developer, utilizing React and Redux.

PORTFOLIO WEBSITE FOR DEVELOPER

With Gasby and Tailwind, an open source portfoilio template for Developers.
