Aung Naing
Win

FRONT-END DEVELOPER

WHY ME?

As a young bloke with immense interest in Information Technology, enrolled in university of Lithan to pursue a career in web/application development industry. Combined with the experience I had and my endless exploration into the heart of technologies, I wanted to learn more and took a break and utilize it. In that brief period, I was able to successfully launch and develop an entire project . With all the wondering of what's going to be next, the journey awaits

WORK EXPERIENCE

YEARS / TIME FRAME

FREELANCE FULL STACK DEVELOPER at Wunder Tek
APR 2022 / -   📍 Yangon, MM

I am working freelance with WunderTek implementing various features for them for both frontend and backend project.

FULL STACK DEVELOPER at Wunder Tek
MAY 2020 / AUG 2021   📍 Yangon, MM

I've experience in working on both front-end and back-end project. In front-end, i've built appealing UI design in harmony with Figma blueprints. The back-end part was done effectively with Express JS along with MongoDB for database purposes. In addition to that. I have used testing libraries for both roles.

FRONT-END DEVELOPER at Zino Tech.
AUG 2019 / MAR 2020   📍 Yangon, MM

Successfully developed and Launched Andriod + Web applications based on React , React Native and ExpressJS. Collaborated with three others developers to manage a PoS system using React and NextJS

PERSONAL PROJECT

ONE PAGE PROTOTYPE (OP2)

A prototyping multiplatform application (windows/mac/linux) built using JS and its relevant frameworks and libaries. Developed for the purpose of creating single webpages in a matter of minutes, codes are generated after the customization is done by the user. also includes the functionality to import and export codes.

SE2020 (PRODUCT MANAGEMENT WEBSITE)

award-winning manage-product website alongside two other team members under the title of SSDLC (Secure Software Development Life Cycle). I contributed to this project as a front-end developer, utilizing React and Redux.

PORTFOLIO WEBSITE FOR DEVELOPER

With Gasby and Tailwind, an open source portfoilio template for Developers.
